SUMMARY

I studying as a Software Engineer at Ton Duc Thang University. Work hard and think smart. I'd like to research new technology and a little algorithms. Now, I am a system engineer and I specialize in AWS. My target is to become a solution architecture in the next five years. Hope that we can share our knowledge and grow up.

RELEVANT EXPERIENCE

System Engineer @FireGroup

May 2020 - Present // HCM City

- + Work with development teams to assist with various automation and configuration tasks.
- + Setup and building CI/CD pipelines using tools like Ansible, Jenkins, Github Action, etc
- + Working with Helm, Docker and Kubernetes.
- + To configure infrastructure which including Dev, Stag, UAT, and Production environments running on Kubernetes. Using GitOps(fluxcd) to deployment applications.
- + Hand-on experience (installing, updating and configuring MySQL, MongoDB, Redis, PostgreSQL)
- + Hands-on experience using Amazon Web Services (AWS) such as EC2, IAM, Route53, S3, CloudWatch, ElastiCache, EKS, ELB.
- + Experience with server-side technologies such as Nginx, Redis.
- + Working experience with cloud monitoring, logging and alerting solutions (ELK stack, Prometheus & Grafana, AWS CloudWatch, FluentD)
- + Used Jira for tracking and ticketing.
- + HelpDesk and Networking of Company.

InternShip - System Admin @TMA Solutions

April - September 2019 // HCM City

- + Monitoring hosts with CollectD, InfluxDB and Grafana
- + Installations, configurations, troubleshooting, and repairs of computers.
