### Brief Introduction

I am a System Engineer and studying at Ton Duc Thang University. Work hard and think smart. I'd like to research new technology and a little algorithms. I specialize in AWS. My target is to become a Leader Solution Architecture in the next five years. Hope that we can share our knowledge and grow up.

### Work Experience

#### System Engineer @FireGroup

May 2020 - Present - Viet Nam

FireGroup is a company building product on Shopify eCommerce platform.

- I had joined development teams to assist with various automation, discuss and recommend technologies for the products.
- I did set-up and building CI/CD pipelines using tools like Jenkins, Github Action, GitLab CI, Ansible, etc
- I had created Helm Charts using for GitOps(fluxcd) to deployment applications on Kubernetes.
- Using Terraform to build infrastructure as code which including staging, uat, and production environments on AWS.
- I hand-on experience (installing, updating and configuring MySQL, MongoDB, Redis, PostgreSQL)
- I hands-on experience using Amazon Web Services (AWS) such as ec2, route53, s3, eks, etc
- Experience with server-side technologies such as Nginx.
- Working experience with cloud monitoring, logging and alerting solutions (ELK stack, Prometheus & Grafana, AWS CloudWatch, FluentD)
- Used Jira for tracking and ticketing.
- HelpDesk and Networking of Company.

#### InternShip - System Admin @TMA Solutions

April - September 2019 - HCM City

- + Monitoring hosts with CollectD, InfluxDB and Grafana
- + Installations, configurations, troubleshooting, and repairs of computers.

### Education

#### Ton Duc Thang University

Software Engineer

2015 - Present - HCM City

### Skill

#### Programming Languages

Python, Shell, Java, NodeJs.

#### Tools & Platforms

Docker/Kubernetes/Jenkins/Git/

AWS/GCP/Cloudflare

#### Other Skills

Figma

#### Languages

English: basic communication.

I learn on [Cambly](#).

TOEIC: 500 Point

#### Social
